UNIGEL 400N Series

Revision Date: December 2021

SECTION 1: IDENTIFICATION OF THE SUBSTANCE / MIXTURE AND OF THE COMPANY / UNDERTAKING

1. 1 - Product identifier

Product name: UNIGEL 400N Series
Chemical name: Gelled hydrocarbon
Appearance and odour: Translucent gel

1.2 - Relevant identified uses of the substance or mixture and uses advised against

Manufacture of substance: Industrial use for telecommunication cables

Insulating gel: Industrial

Use in laboratories: Industrial & Professional

1.3 - Details of the supplier of the safety data sheet

UNIGEL (UK) Limited UNIGEL Inc. UNIGEL Compounds SDN BHD

Dudley Road, Tipton, 1027 19th Street S.W. 11, Jalan Utas 15/7, West Midlands, Hickory, 40200 Shah Alam,

DY4 8EH, North Carolina 28602, Selangor, United Kingdom USA Malaysia

Contact details:

Tel: +44 (0) 1273 612122 Tel: +1 828 855 9075 Tel: +60 (0) 3-5519 5599 Fax: +44 (0) 1273 855717 Fax: +1 828 855 9076 Fax: +60 (0) 3-5522 6029

Email: info@unigel.com

1.4 – Emergency telephone number

Telephone number: As Above (1.3)
Hours of operation: Mon-Fri: 8:30 – 17:00
Information limitation: Not applicable

SECTION 2: HAZARDS IDENTIFICATION

2.1 - Classification of the substance or mixture

Product definition: Mixture

Classification according to Not classified. This product contains highly defined base oil and is not considered to Regulation (EC) No. 1272/2008: present any health hazards during normal use, although OEL for oil mist should be

present any nearth hazards during normal use, although OLE for on his should be

observed

2.2 - Label elements

Signal word: No signal word

Hazard statements: No known significant effects or critical hazards.

Hazard symbol or symbols: Not applicable Indication of danger: Not applicable

Risk phases: This product is not classified according to EU legislation

Safety phases: Not applicable Hazardous ingredients: Not applicable

Supplemental label elements: Material safety data sheet available for professional user on request

2.3 - Other hazards

Other hazards which do not result in Not available

classification:

UNIGEL 400N Series

Revision Date: December 2021

5-15

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS			
Chemical / Common Name	CAS No:	EINECS No:	Wt %:
Distillates (petroleum), hydrotreated heavy paraffinic	64742-54-7*	265-157-1*	85-95

^{*}This material satisfies note L of the CLP classification and can be shown to contain less than 3% DMSO extract as measured by IP346. Therefore, it is not classified as carcinogenic.

SECTION 4: FIRST AID MEASURES

Thermoplastic Elastomer

4.1 - Description of first aid measures

Eyes: Check for and remove any contact lenses. Immediately flush eyes with plenty of water

for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical

attention immediately.

Skin: In case of contact, immediately flush skin with plenty of water while removing

contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Wash clothing before reuse. Clean shoes thoroughly before

reuse. Get medical attention if large amount of exposure has occurred.

68648-89-5

Inhalation: Move exposed person to fresh air. If not breathing or if breathing is irregular or if

respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention

immediately.

Ingestion: Wash out mouth with water. Do not induce vomiting unless directed to do so by

medical personnel. Never give anything by mouth to an unconscious person. Get

medical attention immediately.

Protection of first-aiders: No action shall be taken involving any personal risk or without suitable training.

4.2 - Most important symptoms and effects, both acute and delayed

Potential acute health effects: No known significant effects or critical hazards

Over-exposure signs/symptoms: Repeated skin exposure can produce local skin destruction or dermatitis.

4.3 - Indication of any immediate medical attention and special treatment needed

Notes to physician: Treat symptomatically. Contact poison treatment specialist immediately if large

quantities have been ingested or inhaled.

Specific treatments: No specific treatment.

SECTION 5: FIRE FIGHTING MEASURES

5.1 – Extinguishing media

Suitable extinguishing media: Use an extinguishing agent suitable for the surrounding fire.

Foam (Specifically trained personnel only)
Water fog (Specifically trained personnel only)

Dry chemical powder Carbon dioxide

Other inert gases (Subject to regulations)

Sand or earth

Unsuitable extinguishing media: Do not use direct water jets on the burning product; they could cause splattering and

spread the fire. Simultaneous use of foam and water on the same surface is to be

avoided as water destroys the foam.

UNIGEL 400N Series

Revision Date: December 2021

5.2 - Special hazards arising from the substance or mixture

Hazards from the substance or mixture: In a fire or if heated, a pressure increase will occur and the container may burst. Hazardous combustion products: Carbon oxides (CO, CO2), nitrogen oxides (NOx), sulphur oxides (SOx), smoke

and irritating vapours as products of incomplete combustion.

5.3 - Advice for fire fighters

Special precautions for fire-fighters: Promptly isolate the scene by removing all persons from the facility of the

incident if there is a fire. No action shall be taken involving any personal risk or

without suitable training.

Special protective equipment for fire-

fighters:

Fire fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire fighters (including helmets, protective boots and gloves) conforming to the European standard EN 469 will provide a basic level of

protection for chemical incidents.

Additional information: Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to

heat or sources of ignition.

SECTION 6: ACCIDENTAL RELEASE MEASURE

6.1 - Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: No action shall be taken involving any personal risk or without suitable training.

Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate

personal protective equipment.

For emergency responders: If specialised clothing is required to deal with the spillage, take note of any

information in SECTION 8 on suitable and unsuitable materials.

6.2 - Environmental precaution

Accidental spillage and release of material into the environment:

Avoid dispersal of spilt material and runoff and contact with oil, waterways, drains and sewers. Inform the relevant authorities if the product has caused

environmental pollution.

6.3 - Methods and materials for containment and cleaning up

Small spillage: Stop leak if without risk and wipe or absorb with oil soaking pads, sawdust, sand

etc. and shovel up and place all into an appropriate waste disposal container.

Dispose of via a licensed waste disposal contractor.

Large spillage: Stop leak if without risk. Move container from spill area once the leak has been

stopped. Prevent entry into sewers, watercourses or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according

to local regulations. Dispose of via a licensed waste disposal contractor.

6.4 – Reference to other sections: See **section 1** for emergency contact information.

See **section 8** for information on appropriate personal protective equipment.

See **section 13** for additional waste treatment information.

UNIGEL 400N Series

Revision Date: December 2021

SECTION 7: HANDLING AND STORAGE

The information in this section contains generic advice and guidance. It shall emphasise precautions that are appropriate to the identified uses referred to under **subsection 1.2** and the unique properties of the substance mixture.

7.1 - Precautions for safe handling

Protective measures: Put on appropriate personal protective equipment (See section 4 and section 8)

Advice on general occupational

hygiene:

Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating and drinking areas.

7.2 - Conditions for safe storage, including any incompatibilities.

Storage condition: Store in accordance with local regulations. Store in original container protected

from direct sunlight, in a dry, cool and well-ventilated area, away from incompatible materials (see **section 10**) and elevated temperature. Keep containers tightly closed and sealed until ready for use. Keep Drum/IBC/Unibag/SS-Vessel/Keg covered away from rain, if left outside in open

environment.

Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate

containment to avoid environmental contamination.

7.3 - Specific end use(s)

Industrial sector specific solution: Not available

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 - Control parameters

Based on base oil used

Product / Ingredient name Exposure limit values

Distillates (petroleum), hydrotreated heavy paraffinic 64742-54-7

ACGIH TLV (United States). Notes: oil mist TWA: 5 mg/m³, (Inhalable fraction) 8hour(s).

ACGIH TLV (United States). Notes: oil mist

STEL: 10 mg/m³

8.2 - Exposure controls

Appropriate engineering controls: No special ventilation requirements. Good general ventilation should be

sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any

recommended or statutory limits.

UNIGEL 400N Series

Revision Date: December 2021

8.2.1 - Individual protection measure

Eye/face protection: Safety eyewear complying with an approved standard should be used

when a risk assessment indicates this is necessary to avoid exposure to

mixture splashes or mist.

Skin protection: Chemical-resistant, impervious gloves complying with an approved

standard should be worn at all times when handling the mixture/gel products if a risk assessment indicates this is necessary. >8 hours

(breakthrough time): neoprene, nitrile, Viton®.

Personal protective equipment for the body, appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by

specialist before handling this product.

Respiratory protection: None required under normal conditions.

Thermal hazard: None required under normal conditions.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 - Information on basic physical and chemical properties

Appearance: Clear translucent gel

Odour: No odour Odour threshold: Not available Not available Melting point/freezing point: Not available Initial boiling point and boiling range: Not available Flash point: (Open cup) >220°C **Evaporation rate:** Not available Flammability (Solid, gas): Not available Upper/lower flammability or explosive limits: Not available Not available Vapour pressure: Vapour density: Not available Density (25°C): 0.86 +/- 0.02 g/ml

Solubility (ies): Insoluble in water, soluble in petroleum solvents

Partition coefficient: n-octanol/water Not available
Auto-ignition temperature: Not available
Decomposition temperature: Not available
Viscosity: Not applicable

Explosive properties: Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers

to heat or sources of ignition.

Oxidising properties: Not available

9.1 – Other informationNo additional information

UNIGEL 400N Series

Revision Date: December 2021

SECTION 10: STABILITY AND REACTIVITY

Reactivity: No specific test data related to reactivity available for this product or its

ingredients.

Chemical stability: Stable under normal conditions

Possibility of hazardous reactions: Under normal conditions of storage and use, hazardous reaction will not occur.

Conditions to avoid: Extreme heat

Incompatible materials: Strong oxidising agents such as liquid chlorine, reducing agents and

concentrated oxygen.

Hazardous decomposition products: Does not decompose at ambient temperature

SECTION 11: TOXICOLOGICAL INFORMATION

11.1 - Information on toxicological effects

11.1.1 - Relevant hazard classes

Acute toxicity:

Skin corrosion/irritation:

Serious eye damage/irritation:

Respiratory or skin sensitisation:

Germ cell mutagenicity:

Not available

Not available

Carcinogenicity: All components listed in Annex VI to which Note L applies, and contained in the

product, have been shown to contain less than 3% DMSO extractable as

measured by IP346. Therefore it is not classified as carcinogenic.

Reproductive toxicity:

STOT-single exposure:

STOT-repeated exposure:

Aspiration hazard:

Not available

Not available

Not available

11.1.2 - Information on likely routes of exposure

Routes of entry anticipated: Oral, Dermal, and Inhalation.

11.1.3 - Symptoms related to the physical, chemical and toxicological characteristics

Inhalation: Not available Ingestion: Not available

Skin contact: Repeated skin exposure can produce local skin destruction or dermatitis.

11.1.4 - Delayed and immediate effects as well as chronic effects from short and long-term exposure

Short-term potential immediate effects: Not available Short-term potential delayed effects: Not available Long-term potential immediate effects: Not available Long-term potential delayed effects: Not available Potential chronic health effects: Not available

UNIGEL 400N Series

Revision Date: December 2021

11.1.5 - Potential chronic health effects

Conclusion/Summary: Not available

General:

No known significant effects or critical hazards
Carcinogenicity:

Not listed as carcinogenic by OSHA, NTP or IARC
Mutagenicity:

No known significant effects or critical hazards
Teratogenicity:

No known significant effects or critical hazards
Developmental effects:

No known significant effects or critical hazards
Fertility effects:

No known significant effects or critical hazards

11.1.6 – Other information: Not available

SECTION 12: ECOLOGICAL INFORMATION

General: In the absence of specific environmental data from this product, the assessment

is based on information for general hydrocarbon components found in lubricant mineral oils. Leaching and penetration through surface soils is generally regarded as resulting in long-term persistence. Based on chemical/physical information from the literature for this product category, no harmful effect to

terrestrial or aquatic habitats would be expected.

Toxicity: Not available

Persistence and degradability: Not available Bio-accumulative potential: Not available

•

Results of PBT and vPvB assessment: Not available

Other adverse effects: No known significant effects or critical hazards.

Not available

SECTION 13: DISPOSAL CONSIDERATIONS

Mobility in soil:

Waste treatment method: Place contaminated materials in disposable containers and dispose of in a

manner consistent with applicable regulations. Waste materials should be dumped or buried in an approved industrial waste landfill. Large quantities maybe incinerated in a suitable combustion chamber. Do not empty into

drains, sewers or watercourses.

Hazardous waste: Within the present knowledge of the supplier, this product is not regarded as

hazardous waste, as defined by EU Directive 91/689/EEC.

UNIGEL 400N Series

Revision Date: December 2021

SECTION 14: TRANSPORT INFORMATION

UN number: Not applicable UN proper shipping name: Not applicable

Transport hazard class(es): Not classified as hazardous

Packing group: Not applicable

Environmental hazards: Not classified as hazardous

Special precautions for user: Not applicable Transport in bulk according to Annex II of Marpol None known

and the IBC code:

Usual shipping containers: Tanks, totes (IBS), fluid bag, drums & cans

SECTION 15: REGULATORY INFORMATION

15.1 - Safety, health and environmental regulations/legislation specific for the substance or mixture

EC Classification: Not classified EC labelling (Symbol, R&S phases): Not required

OSHA (29CFR 1910.1200): Not classified as hazardous

Hazard label data: Not classified

SARA Title III: Contain no extremely hazardous substances

SARA 311/312 reportable hazard: None

SARA 313 toxic release program: Contains no chemicals

Statutory information: The Health and Safety work etc Act, 1974, Environmental Protection

Act. 1990

15.2 – Chemical safety assessment: Complete

(All components of this material are listed on EINECS, DSL, TSCA, METI, AICS and KECI)

SECTION 16: OTHER INFORMATION

The information provided herein is given in good faith and is correct to the best of our knowledge at the date of publication.
